- Emergency Instant Recording
- Schedule/Motion/Sensor recording
- 4 Sensor Inputs, 1 alarm output
- Post alarm recording
- Mouse, Wireless Remote Controller
- 5 Year Limited Warranty
- Simultaneous Viewing
  - VGA   - Composite

Digital Watchdog's MAX standalone DVR

Digital Watchdog is proud to introduce the newest addition to the DW family of DVRs, the DW-MAX. This low cost standalone DVR utilizes the latest MPEG4 part 10 Image compression technology which allows video and stored images to be of the clearest, most precise resolution but sustain file sizes that are 30 to 50 percent smaller than conventional MPEG4 images.

The DW-MAX's easy to use features and search options make it a good solution for small business and residential applications with easy DDNS setup, recording status and system status summary reports as well as mouse and remote driven menus. Convenient search options such as event search and date/time searches make it second to none. The Real Time Operating System (RTOS) delivers superior performance and stability that exceeds the "average" DVR. The DW-MAX offers the same effortless operation while maintaining the high quality that customers have come to expect from Digital Watchdog DVR Products.
